RISK/RETURN SUMMARY

About the Portfolio

The Portfolio:

- Is generally offered to institutional investors and clients of registered investment advisors.
- Does not charge sales commissions or “loads.”
- Is designed for long-term investors.

Management

Dimensional Fund Advisors LP (the “Advisor”) is the investment manager for the Portfolio.

Equity Investment Approach

The Advisor believes that equity investing should involve a long-term view and a focus on asset class (e.g., non-U.S. company stocks) selection, not stock picking. It places priority on controlling expenses, portfolio turnover, and trading costs. Many other investment managers concentrate on reacting to price movements and choosing individual securities.

Portfolio construction: Generally, the Advisor structures the Portfolio by:

1. Selecting a starting universe of securities (e.g., stocks of non-U.S. operating companies).
2. Creating a sub-set of companies meeting the Advisor’s investment guidelines (e.g., companies associated with a country designated as an Approved Market by the Advisor’s Investment Committee).
3. Excluding the securities of certain companies after analyzing various factors (e.g., liquidity).
4. Purchasing stocks so that the Portfolio is generally diversified within the targeted asset class (i.e., diversified within the asset class emphasizing small capitalization and value companies).

Investment Objective, Strategies, and Risks of the International Vector Equity Portfolio

- *Investment Objective:* Long-term capital appreciation.
- *Investment Strategy:* Purchase a broad portfolio of non-U.S. operating companies with an emphasis on small capitalization and value companies.
- *Principal Risks:* Market Risk, Small Company Risk, and Foreign Securities and Currencies Risk.

☞ **“Value Stocks”:**
Compared to other stocks, value stocks sell for low prices relative to their earnings, cash flows or book value.

☞ In selecting value stocks, the Advisor primarily considers price relative to book value.

☞ The Portfolio’s foreign currency risks generally are not hedged.

Principal Risks

Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, political, and issuer-specific events will cause the value of securities, and the Portfolio that owns them, to rise or fall. Because the value of your investment in the Portfolio will fluctuate, there is the risk that you may lose money.

Small Company Risk: Securities of small companies often are less liquid than those of large companies. As a result, small company stocks may fluctuate relatively more in price.

Foreign Securities and Currencies Risk: Foreign securities prices may decline or fluctuate because of: (a) economic or political actions of foreign governments, and/or (b) less regulated or liquid securities markets. Investors holding these securities also are exposed to foreign currency risk (the possibility that foreign currency will fluctuate in value against the U.S. dollar). The Portfolio generally does not hedge foreign currency risk.

Other Risks

Derivatives: Derivatives are securities, such as futures contracts, whose value is derived from that of other securities or indices. The Portfolio may use derivatives, such as futures contracts and options on futures contracts, to gain market exposure on the Portfolio's uninvested cash pending investment in securities or to maintain liquidity to pay redemptions. The use of derivatives for non-hedging purposes may be considered more speculative than other types of investments. When the Portfolio uses derivatives for non-hedging purposes, the Portfolio will be directly exposed to the risks of those derivatives. Gains or losses from derivative investments may be substantially greater than the derivatives' original cost.

Securities Lending: The Portfolio may lend its portfolio securities to generate additional income. Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio also could lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending may have certain potential adverse tax consequences. See "SECURITIES LOANS" for further information on securities lending.

Other Information

Commodity Pool Operator Exemption: The Portfolio is operated by a person that has claimed an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act ("CEA"), and, therefore, such person is not subject to registration or regulation as a pool operator under the CEA.

Risk and Return Bar Chart and Table

Performance information is not available for the Portfolio because it is new.

FEES AND EXPENSES

This table describes the fees and expenses you may pay if you buy and hold shares of the Portfolio.

Shareholder Fees (fees paid directly from your investment): None

ANNUAL FUND OPERATING EXPENSES (expenses that are deducted from Portfolio assets)

Management Fee	0.45%
Other Expenses	0.17%*
Total Annual Operating Expenses	0.62%
Fee Waiver and/or Expense Reimbursement	<u>(0.02)%</u>
Net Expenses	<u>0.60%**</u>

* “Other Expenses” are annualized expenses based on anticipated fees and expenses payable by the Portfolio through the fiscal year ending November 30, 2008.

** Pursuant to a Fee Waiver and Expense Assumption Agreement for the Portfolio, the Advisor has agreed to waive all or a portion of its management fee and to assume expenses of the Portfolio to the extent necessary to reduce the Portfolio’s ordinary operating expenses (not including expenses incurred through an investment in other investment companies) (“Portfolio Expenses”) to the extent necessary to limit the Portfolio Expenses of the Portfolio to 0.60% of the Portfolio’s average net assets on an annualized basis (“Expense Limitation Amount”). At any time that the annualized Portfolio Expenses of the Portfolio are less than the Portfolio’s Expense Limitation Amount, the Advisor retains the right to seek reimbursement for any fees previously waived and/or expenses previously assumed to the extent that such reimbursement will not cause the Portfolio’s annualized expenses to exceed the Portfolio’s Expense Limitation Amount. The Portfolio is not obligated to reimburse the Advisor for fees previously waived and/or expenses previously assumed by the Advisor more than thirty-six months before the date of such reimbursement. The Fee Waiver Agreement will remain in effect for an initial period until April 1, 2009, and then shall continue in effect from year to year thereafter, for one-year periods, unless terminated by DFA Investment Dimensions Group Inc. (the “Fund”) or the Advisor.

EXAMPLE

This Example is meant to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Portfolio’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be as follows:

	<u>1 Year</u>	<u>3 Years</u>
International Vector Equity Portfolio	\$61	\$197

Because the Portfolio is new, the Example is based on the anticipated expenses for the Portfolio for the current fiscal year, and does not extend over five- and ten-year periods. The costs for the Portfolio reflect the “Net Expenses” of the Portfolio that result from the contractual expense waiver and assumption in the first year only.

HIGHLIGHTS

Management Services

The Advisor serves as investment advisor to the Portfolio. See “MANAGEMENT OF THE PORTFOLIO.”

Dividend Policy

The Portfolio distributes dividends from its net investment income quarterly (on a calendar basis) and any net realized capital gains in December of each year. See “DIVIDENDS, CAPITAL GAINS DISTRIBUTIONS, AND TAXES.”

Purchase, Valuation, and Redemption of Shares

The shares of the Portfolio are offered and redeemed at net asset value, which is calculated as of the close of the New York Stock Exchange (the “NYSE”) on each day that the NYSE is open for business. The value of the Portfolio’s shares will fluctuate in relation to the Portfolio’s own investment experience. See “PURCHASE OF SHARES,” “VALUATION OF SHARES,” and “REDEMPTION OF SHARES.”

INVESTMENT OBJECTIVE AND POLICIES

Investment Objective and Policies

The investment objective of the Portfolio is to achieve long-term capital appreciation. The Portfolio’s investment objective may be changed without shareholder approval.

The Portfolio seeks to achieve its investment objective by purchasing a broad and diverse group of stocks of non-U.S. operating companies, with an increased exposure to small capitalization and value companies relative to the International Universe. For purposes of the Portfolio, the Advisor defines the International Universe as a market capitalization weighted portfolio of non-U.S. companies associated with developed markets that have been designated as Approved Markets (as identified below) for investment by the Advisor’s Investment Committee (the “International Universe”).

The increased exposure to small capitalization and value companies may be achieved by decreasing the allocation of the Portfolio’s assets to the largest growth companies relative to their weight in the International Universe or by avoiding purchases in that segment of the market, either of which would result in a greater weight allocation to small capitalization and value companies. The percentage allocation of the assets of the Portfolio to securities of the largest growth companies as defined below will generally be reduced from between 5% and 50% of their percentage weight in the International Universe. For example, as of December 31, 2007, securities of the largest growth companies in the International Universe comprised approximately 16% of the International Universe and the Advisor would have allocated approximately 0% of the Portfolio to securities of the largest growth companies in the International Universe.

An equity issuer is considered a growth company primarily because it has a low, non-negative book value in relation to its market capitalization. An equity issuer is considered a value company primarily because it has a high book value in relation to its market capitalization. In assessing growth and value, the Advisor may consider additional factors, such as price-to-cash-flow or price-to-earnings ratios, as well as economic conditions and developments in the issuer's industry. The criteria the Advisor uses for assessing growth and value are subject to change from time to time.

The Advisor determines company size on a country or region specific basis and based primarily on market capitalization. The Advisor will also establish a minimum market capitalization that a company must meet in order to be considered for purchase, which minimum will change due to market conditions.

As a non-fundamental policy, under normal circumstances, the Portfolio will invest at least 80% of its net assets in equity securities. If the Portfolio changes this investment policy, the Portfolio will notify shareholders at least sixty days before the change, and will change the name of the Portfolio.

As of the date of this Prospectus, the International Universe is comprised of the following countries, which are designated as "Approved Markets" in which the Portfolio is authorized to invest: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom. The Advisor will determine, in its discretion, when and whether to invest in countries that have been authorized as Approved Markets, depending on a number of factors, such as asset growth in the Portfolio and the characteristics of each country's markets. The Investment Committee of the Advisor also may designate other countries as Approved Markets for investment in the future, in addition to the countries identified above, or the Investment Committee may remove one or more countries from the list of Approved Markets. In addition, the Portfolio may continue to hold investments in countries that are not currently designated as Approved Markets, but had been authorized for investment in the past, and may reinvest distributions received in connection with such existing investments in such previously Approved Markets.

The Portfolio invests in securities associated with Approved Markets (as identified above) listed on bona fide securities exchanges or traded on the over-the-counter markets. These exchanges or over-the-counter markets may be either within or outside the issuer's domicile country. For example, the securities may be listed or traded in the form of European Depositary Receipts, Global Depositary Receipts, American Depositary Receipts, or other types of depositary receipts (including non-voting depositary receipts) or may be listed on bona fide securities exchanges in more than one country. The Portfolio will consider for purchase securities that are associated with an Approved Market, and include, among others: (a) securities of companies that are organized under the laws of, or maintain their principal place of business in, an Approved Market; (b) securities for which the principal trading market is in an Approved Market; (c) securities issued or guaranteed by the government of an Approved Market, its agencies or instrumentalities, or the central bank of such country or territory; (d) securities denominated in an Approved Market currency issued by companies to finance operations in Approved Markets; (e) securities of companies that derive at least 50% of their revenues or profits from goods produced or sold, investments made, or services performed in Approved Markets or have at least 50% of their assets in Approved Markets; (f) equity securities of companies in Approved Markets in the form of depositary shares; (g) securities of pooled investment vehicles that invest primarily in securities of Approved Markets or derivative instruments that derive their value from securities of Approved Markets; or (h) securities included in the Portfolio's benchmark index. Securities of Approved Markets may include securities of companies that have characteristics and business relationships common to companies in other countries or regions. As a result, the value of the securities of such companies may reflect economic and market forces in such other countries or regions as well as in the Approved Markets. The

Advisor, however, will select only those companies that, in its view, have sufficiently strong exposure to economic and market forces in Approved Markets. For example, the Advisor may invest in companies organized and located in the United States or other countries or regions outside of Approved Markets, including companies having their entire production facilities outside of Approved Markets, when such companies meet the criteria discussed above to be considered associated with Approved Markets.

The Portfolio does not seek current income as an investment objective and investments will not be based upon an issuer's dividend payment policy or record. However, many of the companies whose securities will be included in the Portfolio do pay dividends. It is anticipated, therefore, that the Portfolio will receive dividend income.

The Portfolio also may invest in exchange-traded funds ("ETFs") and similarly structured pooled investments for the purpose of gaining exposure to the equity markets, including the U.S. equity market, while maintaining liquidity. The Portfolio also may use derivatives, such as futures contracts and options on futures contracts, to gain market exposure on the Portfolio's uninvested cash pending investment in securities or to maintain liquidity to pay redemptions. The Portfolio may enter into futures contracts and options on futures contracts for foreign or U.S. equity securities and indices.

In addition to money market instruments and other short-term investments, the Portfolio may invest in affiliated and unaffiliated registered or unregistered money market funds to manage the Portfolio's cash pending investment in other securities or to maintain liquidity for the payment of redemptions or other purposes. Investments in money market funds may involve a duplication of certain fees and expenses.

Portfolio Construction

Under normal market conditions, the Portfolio intends to invest its assets in companies organized in, having a majority of their assets in, or deriving a majority of their operating income from at least three non-U.S. countries, and no more than 40% of the Portfolio's assets will be invested in such companies in any one country.

SECURITIES LOANS

The Portfolio is authorized to lend securities to qualified brokers, dealers, banks, and other financial institutions for the purpose of earning additional income. While the Portfolio may earn additional income from lending securities, such activity is incidental to the investment objective of the Portfolio. The value of securities loaned may not exceed 33 1/3% of the value of the Portfolio's total assets, which includes the value of collateral received. To the extent the Portfolio loans a portion of its securities, the Portfolio will receive collateral consisting generally of cash or U.S. government securities, which will be maintained by marking to market daily in an amount equal to at least: (i) 100% of the current market value of the loaned securities, with respect to securities of the U.S. government or its agencies; (ii) 102% of the current market value of the loaned securities, with respect to U.S. securities; and (iii) 105% of the current market value of the loaned securities, with respect to foreign securities. Subject to its stated investment policies, the Portfolio may invest the collateral received for the loaned securities in securities of the U.S. government or its agencies, repurchase agreements collateralized by securities of the U.S. government or its agencies, and affiliated and unaffiliated registered and unregistered money market funds. For purposes of this paragraph, agencies include both agency debentures and agency mortgage-backed securities. In addition, the Portfolio will be able to terminate the loan at any time and will receive reasonable interest on the loan, as well as amounts equal to any dividends, interest, or other distributions on the loaned securities. However, dividend income received from loaned securities may not be eligible to be taxed at qualified dividend income rates. See the

Portfolio's Statement of Additional Information (the "SAI") for a further discussion of the tax consequences related to securities lending. The Portfolio will be entitled to recall a loaned security to vote proxies or otherwise obtain rights to vote proxies of loaned securities if the Portfolio knows that a material event will occur. In the event of the bankruptcy of the borrower, the Fund could experience delay in recovering the loaned securities or only recover cash or a security of equivalent value. See "OTHER RISKS—SECURITIES LENDING" for a discussion of the risks related to securities lending.

MANAGEMENT OF THE PORTFOLIO

The Advisor serves as investment advisor to the Portfolio. As such, the Advisor is responsible for the management of the Portfolio's assets. The Portfolio is managed using a team approach. The investment team includes the Investment Committee of the Advisor, portfolio managers, and trading personnel.

The Investment Committee is composed primarily of certain officers and directors of the Advisor who are appointed annually. As of the date of this Prospectus, the Investment Committee has seven members. Investment strategies for the Portfolio are set by the Investment Committee, which meets on a regular basis and also as needed to consider investment issues. The Investment Committee also sets and reviews all investment related policies and procedures and approves any changes in regards to authorized countries, security types, and brokers.

In accordance with the team approach used to manage the Portfolio, the portfolio managers and portfolio traders implement the policies and procedures established by the Investment Committee. The portfolio managers and portfolio traders also make daily investment decisions regarding the Portfolio, including running buy and sell programs, based on the parameters established by the Investment Committee. Karen E. Umland is the portfolio manager that coordinates the efforts of all other portfolio managers with respect to the day-to-day management of the Portfolio and other international equity portfolios managed by the Advisor.

Ms. Umland is a Senior Portfolio Manager and Vice President of the Advisor and a member of the Investment Committee. She received her BA from Yale University in 1988 and her MBA from the University of California at Los Angeles in 1993. Ms. Umland joined the Advisor in 1993 and has been responsible for the international equity funds since 1998. The SAI provides information about Ms. Umland's compensation, other accounts managed by Ms. Umland, and Ms. Umland's ownership of Portfolio shares.

The Advisor provides the Portfolio with a trading department and selects brokers and dealers to effect securities transactions. Securities transactions are placed with a view to obtaining best price and execution. The Advisor's address is 1299 Ocean Avenue, Santa Monica, CA 90401. For the advisory fee that the Portfolio is expected to incur for the current fiscal year, see "ANNUAL FUND OPERATING EXPENSES." A discussion regarding the basis for the Board of Directors' approving the investment management agreements with respect to the Portfolio will be available in future annual or semi-annual reports to shareholders of the Portfolio.

The Fund bears all of its own costs and expenses, including: services of its independent registered public accounting firm, legal counsel, brokerage fees, commissions, and transfer taxes in connection with the acquisition and disposition of portfolio securities, taxes, insurance premiums, costs incidental to meetings of its shareholders and directors, the cost of filing its registration statements under the federal securities laws and the cost of any filings required under state securities laws, reports to shareholders, and transfer and dividend disbursing agency, administrative services, and custodian fees. Expenses allocable to a particular portfolio of the Fund are so allocated. The expenses of the Fund that

are not allocable to a particular portfolio are borne by each portfolio on the basis of its relative net assets or equally.

The Advisor has been engaged in the business of providing investment management services since May 1981. The Advisor is currently organized as a Delaware limited partnership and is controlled and operated by its general partner, Dimensional Holdings Inc., a Delaware corporation. Prior to November 3, 2006, the Advisor was named Dimensional Fund Advisors Inc. and was organized as a Delaware corporation. The Advisor controls Dimensional Fund Advisors Ltd. (“DFAL”) and DFA Australia Limited (“DFA Australia”). As of July 18, 2008, assets under management for all affiliated advisors totaled approximately \$152 billion.

A discussion regarding the basis for the Board’s approving the investment management agreement with respect to the Portfolio will be available in future annual or semi-annual reports to shareholders of the Portfolio.

Investment Services

The Advisor has entered into a Sub-Advisory Agreement with each of DFAL (7 Down Street, London W1K7AJ, United Kingdom) and DFA Australia (Level 43 Gateway, 1 MacQuarie Place, Sydney, New South Wales 2000, Australia), respectively, with respect to the Portfolio. Pursuant to the terms of each Sub-Advisory Agreement, DFAL and DFA Australia each have the authority and responsibility to select brokers and dealers to execute securities transactions for the Portfolio. Each Sub-Advisor’s duties include the maintenance of a trading desk and the determination of the best and most efficient means of executing securities transactions. On at least a semi-annual basis, the Advisor will review the holdings of the Portfolio and review the trading process and the execution of securities transactions. The Advisor is responsible for determining those securities that are eligible for purchase and sale by the Portfolio and may delegate this task, subject to its own review, to DFAL and DFA Australia. DFAL and DFA Australia maintain and furnish to the Advisor information and reports on companies in certain markets, including recommendations of securities to be added to the securities that are eligible for purchase by the Portfolio, as well as making recommendations and elections on corporate actions. The Advisor pays DFAL and DFA Australia for the services it provides to the Portfolio. DFAL is a member of the Financial Services Authority, a self-regulatory organization for investment managers operating under the laws of England.

DIVIDENDS, CAPITAL GAINS DISTRIBUTIONS, AND TAXES

Dividends and Distributions. The Portfolio intends to qualify each year as a regulated investment company under the Internal Revenue Code. As a regulated investment company, the Portfolio generally pays no federal income tax on the income and gains it distributes to you. In general, the Portfolio distributes substantially all net investment income quarterly (on a calendar basis) and any net realized capital gains (after any reductions for capital loss carryforwards) annually, typically in December. The Portfolio may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Portfolio. The amount of any distribution will vary, and there is no guarantee the Portfolio will pay either an income dividend or a capital gains distribution.

Shareholders of the Portfolio will automatically receive all income dividends and capital gains distributions in additional shares of the Portfolio at net asset value (as of the business date following the dividend record date), unless, upon written notice to the Advisor and completion of account information, the shareholder selects one of the options listed below:

Income Option—to receive income dividends in cash and capital gains distributions in additional shares at net asset value.

Capital Gains Option—to receive capital gains distributions in cash and income dividends in additional shares at net asset value.

Cash Option—to receive both income dividends and capital gains distributions in cash.

Annual Statements. Every January, you will receive a statement that shows the tax status of distributions you received the previous calendar year. Distributions declared in December to shareholders of record in such month, but paid in January, are taxable as if they were paid in December.

Avoid “Buying A Dividend.” If you are a taxable investor and invest in the Portfolio shortly before the record date of a taxable distribution, the distribution will lower the value of the Portfolio’s shares by the amount of the distribution and, in effect, you will receive some of your investment back in the form of a taxable distribution.

Tax Considerations. Dividends and distributions paid to a qualified, tax-deferred retirement plan, such as a 401(k) plan, accumulate free of federal income taxes. In addition, the sale or redemption by a tax-deferred retirement plan of the Portfolio’s shares will not be subject to federal income taxes.

In general, if you are a taxable investor, Portfolio distributions are taxable to you at either ordinary income or capital gains tax rates. This is true whether you reinvest your distributions in additional Portfolio shares or receive them in cash.

For federal income tax purposes, Portfolio distributions of short-term capital gains are taxable to you as ordinary income. Portfolio distributions of long-term capital gains are taxable to you as long-term capital gains no matter how long you have owned your shares. A portion of income dividends designated by the Portfolio may be qualified dividend income eligible for taxation by individual shareholders at long-term capital gains rates provided certain holding period requirements are met.

Sale or Redemption of Portfolio Shares. The sale of shares of the Portfolio is a taxable event and may result in a capital gain or loss to shareholders who are subject to tax. Capital gain or loss may be realized from an ordinary redemption of shares or an exchange of shares between two portfolios. Any loss incurred on a sale or exchange of the Portfolio’s shares, held for six months or less, will be treated as a long-term capital loss to the extent of any long-term capital gains distributed to you with respect to such shares.

Backup Withholding. By law, the Portfolio is required to withhold 28% of taxable dividends, capital gains distributions, and redemption proceeds paid to shareholders who do not provide their proper taxpayer identification numbers and certain required certifications. You may avoid this withholding requirement by providing and certifying on the account registration form your correct Taxpayer Identification Number and by certifying that you are not subject to backup withholding and are a U.S. person (including a U.S. resident alien). The Portfolio must also withhold if the IRS instructs it to do so.

Other. In addition to federal taxes, shareholders may be subject to state and local taxes on distributions from the Portfolio and on gains arising on redemption or exchange of the Portfolio’s shares.

Non-U.S. investors may be subject to U.S. withholding tax at a 30% or lower treaty tax rate on dividends paid by the Portfolio, subject to a limited exemption for dividends designated as capital gain dividends. Notwithstanding such exemption, a non-U.S. investor is subject to backup withholding at a

rate of 28% on dividends, capital gains distributions, and redemption proceeds paid to a shareholder who fails to properly certify that the shareholder is not a U.S. person. Non-U.S. investors also may be subject to U.S. estate tax.

This discussion of “DIVIDENDS, CAPITAL GAINS DISTRIBUTIONS, AND TAXES” is not intended or written to be used as tax advice. Prospective investors should consult the SAI. Because everyone’s tax situation is unique, you should also consult your tax professional about federal, state, local, or foreign tax consequences before making an investment in the Portfolio.

PURCHASE OF SHARES

Cash Purchases

Investors may purchase shares of the Portfolio by first contacting the Advisor at (310) 395-8005 to notify the Advisor of the proposed investment. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions, and a limited number of certain other investors as approved from time to time by the Advisor (“Eligible Investors”). Eligible Investors include employees, former employees, shareholders and directors of the Advisor and the Fund, and friends and family members of such persons. All investments are subject to approval by the Advisor, and all investors must complete and submit the necessary account registration forms in good order. The Fund reserves the right to reject any initial or additional investment and to suspend the offering of shares of the Portfolio.

“Good order” with respect to the purchases of shares means that (1) a fully completed and properly signed Account Registration Form and any additional supporting legal documentation required by the Advisor have been received in legible form, and (2) the Advisor has been notified of the purchase by telephone and, if the Advisor so requests, also in writing, no later than the close of regular trading on the NYSE (normally 1:00 p.m. PST) on the day of the purchase. If an order to purchase shares must be cancelled due to nonpayment, the purchaser will be responsible for any loss incurred by the Fund arising out of such cancellation. To recover any such loss, the Fund reserves the right to redeem shares owned by any purchaser whose order is cancelled, and such purchaser may be prohibited or restricted in the manner of placing further orders.

Investors having an account with a bank that is a member or a correspondent of a member of the Federal Reserve System may purchase shares by first calling the Advisor at (310) 395-8005 to notify the Advisor of the proposed investment, then requesting the bank to transmit immediately available funds (federal funds) by wire to PNC Bank, N.A. for the account of DFA Investment Dimensions Group Inc. (International Vector Equity Portfolio). Additional investments also may be made through the wire procedure by first notifying the Advisor. Investors who wish to purchase shares of the Portfolio by check should send their check to DFA Investment Dimensions Group Inc. (International Vector Equity Portfolio), c/o PNC Global Investment Servicing, P.O. Box 8916, Wilmington, Delaware 19899-8916.

Payment of the total amount due should be made in U.S. dollars. However, subject to approval by the Advisor, payment may be made in any freely convertible currency and the necessary foreign exchange transactions will be arranged on behalf of, and at the expense of, the applicant. Applicants settling in any currency other than U.S. dollars are advised that a delay in processing a purchase or redemption may occur to allow for currency conversion.

Shares also may be purchased and sold by individuals through securities firms that may charge a service fee or commission for such transactions. No such fee or commission is charged on shares that are

purchased or redeemed directly from the Fund. Investors who are clients of investment advisory organizations also may be subject to investment advisory fees under their own arrangements with such organizations.

In-Kind Purchases

If accepted by the Fund, shares of the Portfolio may be purchased in exchange for securities that are eligible for acquisition by the Portfolio or otherwise represented in its portfolio as described in this Prospectus or in exchange for local currencies in which such securities of the Portfolio are denominated. Securities and local currencies accepted by the Fund for exchange and Portfolio shares to be issued in the exchange will be valued as set forth under “VALUATION OF SHARES” at the time of the next determination of net asset value after such acceptance. All dividends, interests, subscription, or other rights pertaining to such securities shall become the property of the Portfolio and must be delivered to the Fund by the investor upon receipt from the issuer. Investors that desire to purchase shares of the Portfolio with local currencies should first contact the Advisor.

The Fund will not accept securities in exchange for shares of the Portfolio unless: (1) such securities are, at the time of the exchange, eligible to be included, or otherwise represented, in the Portfolio and current market quotations are readily available for such securities; (2) the investor represents and agrees that all securities offered to be exchanged are not subject to any restrictions upon their sale by the Portfolio under the Securities Act of 1933 or under the laws of the country in which the principal market for such securities exists, or otherwise; and (3) at the discretion of the Fund, the value of any such security (except U.S. government securities) being exchanged, together with other securities of the same issuer owned by the Portfolio, may not exceed 5% of the net assets of the Portfolio immediately after the transaction. The Fund will accept such securities for investment and not for resale.

A gain or loss for federal income tax purposes will generally be realized by investors who are subject to federal taxation upon the exchange, depending upon the cost of the securities or local currency exchanged. Investors interested in such exchanges should contact the Advisor. Purchases of shares will be made in full and fractional shares calculated to three decimal places. In the interest of economy and convenience, certificates for shares will not be issued.

POLICY REGARDING EXCESSIVE OR SHORT-TERM TRADING

The Portfolio is designed for long-term investors and is not intended for investors that engage in excessive short-term trading activity that may be harmful to the Portfolio, including but not limited to market timing. Short-term or excessive trading into and out of the Portfolio can disrupt portfolio management strategies, harm performance, and increase Portfolio expenses for all shareholders, including long-term shareholders who do not generate these costs.

In addition, the nature of the Portfolio’s holdings may present opportunities for a shareholder to engage in a short-term trading strategy that exploits possible delays between changes in the price of the Portfolio’s holdings and the reflection of those changes in the Portfolio’s net asset value (called “arbitrage market timing”). Such delays may occur because the Portfolio has significant investments in foreign securities where, due to time zone differences, the values of those securities are established some time before the Portfolio calculates its net asset value. In such circumstances, the available market prices for such foreign securities may not accurately reflect the latest indications of value at the time the Portfolio calculates its net asset value. There is a possibility that arbitrage market timing may dilute the value of the Portfolio’s shares if redeeming shareholders receive proceeds (and purchasing shareholders receive shares) based upon a net asset value that does not reflect appropriate fair value prices).

The Board of Directors of the Fund (the “Board”) has adopted a policy (the “Trading Policy”) and the Advisor and DFA Securities Inc. (collectively, “Dimensional”) and their agents have implemented the following procedures, which are designed to discourage and prevent market timing or excessive short-term trading in the Portfolio: (i) trade activity monitoring and purchase blocking procedures, and (ii) use of fair value pricing.

The Fund, Dimensional, and their agents monitor trades and flows of money into and out of the Portfolio from time to time in an effort to detect excessive short-term trading activities, and for consistent enforcement of the Trading Policy. The Fund reserves the right to take the actions necessary to stop excessive or disruptive trading activities, including refusing or canceling purchase or exchange orders for any reason, without prior notice, particularly purchase or exchange orders that the Fund believes are made on behalf of market timers. The Fund, Dimensional, and their agents reserve the right to restrict, refuse, or cancel any purchase or exchange request made by an investor indefinitely if the Fund or Dimensional believes that any combination of trading activity in the accounts is potentially disruptive to the Portfolio. In making such judgments, the Fund and Dimensional seek to act in a manner that is consistent with the interests of shareholders. For purposes of applying these procedures, Dimensional may consider an investor’s trading history in the Portfolio and accounts under common ownership, influence, or control.

In addition to the Fund’s general ability to restrict potentially disruptive trading activity as described above, the Fund also has adopted purchase blocking procedures. Under the Fund’s purchase blocking procedures, where an investor has engaged in any two purchases and two redemptions (including redemptions that are part of an exchange transaction) in the Portfolio in any rolling 30 calendar day monitoring period (i.e., two “round-trips”), the Fund and Dimensional intend to block the investor from making any additional purchases in the Portfolio for 90 calendar days (a “purchase block”). If implemented, a purchase block will begin at some point after the transaction that caused the investor to have engaged in the prohibited two round-trips is detected by the Fund, Dimensional, or their agents. The Fund and Dimensional are permitted to implement a longer purchase block, or permanently bar future purchases by an investor, if they determine that it is appropriate.

Under the Fund’s purchase blocking procedures, the following purchases and redemptions will not trigger a purchase block: (i) purchases and redemptions of shares having a value in each transaction of less than \$5,000; (ii) purchases and redemptions by U.S.-registered investment companies that operate as funds of funds pursuant to Section 12(d)(1)(G) of the Investment Company Act of 1940 (the “1940 Act”) or an SEC exemptive order, and non-U.S. investment companies that operate as funds of funds (subject to monitoring by Dimensional); (iii) purchases and redemptions by a feeder portfolio of a master fund’s shares; (iv) systematic or automated transactions where the shareholder, financial advisor, or investment fiduciary does not exercise direct control over the investment decision; (v) retirement plan contributions, loans, loan repayments, and distributions (including hardship withdrawals) identified as such in the retirement plan recordkeeper’s system; (vi) purchase transactions involving transfers of assets, rollovers, Roth IRA conversions, and IRA recharacterizations; (vii) purchases of shares with Portfolio dividends or capital gain distributions; (viii) transfers and registrations of shares within the Portfolio; and (ix) transactions by 529 Plans. Notwithstanding the Fund’s purchase blocking procedures, all transactions in Portfolio shares are subject to the right of the Fund and Dimensional to restrict potentially disruptive trading activity (including purchases and redemptions described above that will not be subject to the purchase blocking procedures).

The Fund, Dimensional, or their designees have the ability, pursuant to Rule 22c-2 under the 1940 Act, to request information from financial intermediaries, such as 401(k) plan administrators, trust companies, and broker-dealers (together, “Intermediaries”), concerning trades placed in omnibus and other multi-investor accounts (together, “Omnibus Accounts”), in order to attempt to monitor trades that are placed by the underlying shareholders of these Omnibus Accounts. The Fund, Dimensional, and their

designees will use the information obtained from the Intermediaries to monitor trading in the Fund and to attempt to identify shareholders in Omnibus Accounts engaged in trading that is inconsistent with the Trading Policy or otherwise not in the best interests of the Fund. The Fund, Dimensional, or their designees, when they detect trading patterns in shares of the Portfolio (or other portfolios of the Fund) that may constitute short-term or excessive trading, will provide written instructions to the Intermediary to restrict or prohibit further purchases or exchanges of shares of the Portfolio (and other portfolios of the Fund) by a shareholder that has been identified as having engaged in excessive or short-term transactions in the Portfolio's shares (directly or indirectly through the Intermediary's account) that violate the Trading Policy.

The ability of the Fund and Dimensional to impose these limitations, including the purchase blocking procedures, on investors investing through Intermediaries is dependent on the receipt of information necessary to identify transactions by the underlying investors and the Intermediary's cooperation in implementing the Trading Policy. Investors seeking to engage in excessive short-term trading practices may deploy a variety of strategies to avoid detection, and despite the efforts of the Fund and Dimensional to prevent excessive short-term trading, there is no assurance that the Fund, Dimensional, or their agents will be able to identify those shareholders or curtail their trading practices. The ability of the Fund, Dimensional, and their agents to detect and limit excessive short-term trading also may be restricted by operational systems and technological limitations.

The purchase blocking procedures of the Trading Policy may not apply to redemptions by shareholders whose shares are held on the books of Intermediaries if the Intermediaries have not adopted procedures to implement this Policy. The Fund and Dimensional will work with Intermediaries to develop such policies to institute the purchase blocking procedures or other procedures that the Fund and Dimensional determine are reasonably designed to achieve the objective of this Trading Policy. At the time the Intermediaries adopt these procedures, shareholders whose accounts are on the books of such Intermediaries will be subject to the Trading Policy's purchase blocking procedures or another frequent trading policy that achieves the objective of the purchase blocking procedures. Investors that invest in the Portfolio through an Intermediary should contact the Intermediary for information concerning the policies and procedures that apply to the investors.

As of the date of this Prospectus, the ability of the Fund and Dimensional to apply the purchase blocking procedures on purchases by all investors, and the ability of the Fund and Dimensional to monitor trades through Omnibus Accounts maintained by Intermediaries, may be restricted due to systems limitations of both the Fund's service providers and the Intermediaries. The Fund expects that the application of the Trading Policy as described above, including the purchase blocking procedures (subject to the limitations described above), will be able to be implemented by Intermediaries in compliance with Rule 22c-2 under the 1940 Act.

In addition, the purchase blocking procedures will not apply to a redemption transaction in which the Portfolio distributes portfolio securities to a shareholder in-kind, where the redemption will not disrupt the efficient portfolio management of the Portfolio and the redemption is consistent with the interests of the remaining shareholders of the Portfolio.

In addition to monitoring trade activity, the Board has adopted fair value pricing procedures that govern the pricing of the securities of the Portfolio. These procedures are designed to help ensure that the prices at which Portfolio shares are purchased and redeemed are fair, and do not result in dilution of shareholder interests or other harm to shareholders. See the discussion under "VALUATION OF SHARES—Net Asset Value" for additional details regarding fair value pricing of the Portfolio's securities.

Although the procedures are designed to discourage excessive short-term trading, none of the procedures individually nor all of the procedures taken together can completely eliminate the possibility that excessive short-term trading activity in the Portfolio may occur.

VALUATION OF SHARES

Net Asset Value

The net asset value per share of the Portfolio is calculated on days that the NYSE is open for trading. The net asset value per share of the Portfolio is calculated after the close of the NYSE (normally, 1:00 p.m. PT) by dividing the total value of the Portfolio's investments and other assets, less any liabilities, by the total outstanding shares of the stock of the Portfolio. The Portfolio generally calculates its net asset value per share and accepts purchase and redemption orders on days that the NYSE is open for trading. *Note:* The time at which transactions and shares are priced may be changed in case of an emergency or if the NYSE closes at a time other than 1:00 p.m. PT.

The value of shares of the Portfolio will fluctuate in relation to its investment experience. Securities held by the Portfolio will be valued in accordance with applicable laws and procedures adopted by the Board, and generally, as described below.

Securities held by the Portfolio (including over-the-counter securities) are valued at the last quoted sales price of the day. Securities held by the Portfolio that are listed on Nasdaq are valued at the Nasdaq Official Closing Price ("NOCP"). If there is no last reported sales price or NOCP of the day, the Portfolio values the securities at the mean between the most recent quoted bid and asked prices. Price information on listed securities is taken from the exchange where the security is primarily traded. Generally, securities issued by open-end investment companies are valued using their respective net asset values or public offering prices, as appropriate, for purchase orders placed at the close of the NYSE.

The value of the securities and other assets of the Portfolio for which no market quotations are readily available (including restricted securities), or for which market quotations have become unreliable, are determined in good faith at fair value in accordance with procedures adopted by the Board of the Fund. Fair value pricing also may be used if events that have a significant effect on the value of an investment (as determined in the discretion of the Investment Committee of the Advisor) occur before the net asset value is calculated. When fair value pricing is used, the prices of securities used by the Portfolio may differ from the quoted or published prices for the same securities on their primary markets or exchanges.

The Portfolio will also fair value price in the circumstances described below. Generally, trading in foreign securities markets is completed each day at various times prior to the close of the NYSE. For example, trading in the Japanese securities markets is completed each day at the close of the Tokyo Stock Exchange (normally, 11:00 p.m. PT), which is fourteen hours prior to the close of the NYSE (normally, 1:00 p.m. PT) and the time that the net asset value of the Portfolio is computed. Due to the time differences between the closings of the relevant foreign securities exchanges and the time the Portfolio prices its shares at the close of the NYSE, the Portfolio will fair value its foreign investments when it is determined that the market quotations for the foreign investments are either unreliable or not readily available. The fair value prices will attempt to reflect the impact of the U.S. financial markets' perceptions and trading activities on the Portfolio's foreign investments since the last closing prices of the foreign investments were calculated on their primary foreign securities markets or exchanges. For these purposes, the Board has determined that movements in relevant indices or other appropriate market indicators, after the close of the Tokyo Stock Exchange or the London Stock Exchange, demonstrate that market quotations may be unreliable, and may trigger fair value pricing. Consequently, fair valuation of

portfolio securities may occur on a daily basis. The fair value pricing by the Portfolio utilizes data furnished by an independent pricing service (and that data draws upon, among other information, the market values of foreign investments). The fair value prices of portfolio securities generally will be used when it is determined that the use of such prices will have a material impact on the net asset value of the Portfolio. When the Portfolio uses fair value pricing, the values assigned to the Portfolio's foreign investments may not be the quoted or published prices of the investments on their primary markets or exchanges. The Board monitors the operation of the method used to fair value price the Portfolio's foreign investments.

Valuing securities at fair value involves greater reliance on judgment than valuing securities that have readily available market quotations. There can be no assurance that the Portfolio could obtain the fair value assigned to a security if it were to sell the security at approximately the time at which the Portfolio determines its net asset value per share. As a result, the sale or redemption by the Portfolio of its shares at net asset value, at a time when a holding or holdings are valued at fair value, may have the effect of diluting or increasing the economic interest of existing shareholders.

The net asset value per share of the Portfolio is expressed in U.S. dollars by translating the net assets of the Portfolio using the mean of the most recent bid and asked prices for the dollar as quoted by generally recognized reliable sources. Since the Portfolio owns securities that are primarily listed on foreign exchanges which may trade on days when the Portfolio does not price its shares, the net asset value of the Portfolio may change on days when shareholders will not be able to purchase or redeem shares.

Futures contracts are valued using the settlement price established each day on the exchange on which they are traded. The value of such futures contracts held by the Portfolio is determined each day as of such close.

Public Offering Price

Provided that the transfer agent has received the investor's Account Registration Form in good order and the custodian has received the investor's payment, shares of the Portfolio will be priced at the public offering price, which is the net asset value of the shares next determined after receipt of the investor's funds by the custodian. The transfer agent or the Fund may appoint, from time to time, sub-transfer agents or various financial intermediaries ("Intermediaries") for the receipt of purchase orders, redemption orders, and funds from certain investors. Intermediaries, in turn, are authorized to designate other financial intermediaries ("Sub-designees") to receive purchase and redemption orders for the Portfolio's shares from investors. With respect to such investors, the shares of the Portfolio will be priced at the public offering price calculated after receipt of the purchase order by the Intermediary or Sub-designee, as applicable, that is authorized to receive purchase orders. If the investor buys shares through an Intermediary or Sub-designee, the purchase price will be the public offering price next calculated after the Intermediary or Sub-designee, as applicable, receives the order, rather than on the day the custodian receives the investor's payment (provided that the Intermediary or Sub-designee, as applicable, has received the investor's purchase order in good order, and the investor has complied with the Intermediary's or Sub-designee's payment procedures). No reimbursement fee or sales charge is imposed on purchases. If an order to purchase shares must be canceled due to non-payment, the purchaser will be responsible for any loss incurred by the Portfolio arising out of such cancellation. The Fund reserves the right to redeem shares owned by any purchaser whose order is canceled to recover any resulting loss to the Portfolio and may prohibit or restrict the manner in which such purchaser may place further orders.

EXCHANGE OF SHARES

Investors may exchange shares of the Portfolio for shares of another portfolio by first contacting the Advisor at (310) 395-8005 to notify the Advisor of the proposed exchange and then completing a letter of instruction and sending it to: DFA Investment Dimensions Group Inc. Letters of instruction regarding exchange of shares may be mailed to the following address:

DFA Investment Dimensions Group Inc.
Attn: Client Operations
1299 Ocean Avenue
Santa Monica, CA 90401

Exchanges are accepted only into those portfolios that are eligible for the exchange privilege. Investors should contact their financial advisor for a list of those portfolios that accept exchanges.

The minimum amount for an exchange is \$100,000. Contact the Advisor for information regarding the portfolios available for exchanges and to request copies of the prospectuses of such portfolios. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary for information regarding exchanges. There is no fee imposed on an exchange. However, the Fund reserves the right to impose an administrative fee in order to cover the costs incurred in processing an exchange. Any such fee will be disclosed in the Prospectus. An exchange is treated as a redemption and a purchase. Therefore, an investor could realize a taxable gain or loss on the transaction. The Fund reserves the right to revise or terminate the exchange privilege, limit the amount of or reject any exchange, or waive the minimum amount requirement as deemed necessary, at any time.

Investors in the Portfolio also may exchange all or part of their Portfolio shares into certain portfolios of Dimensional Investment Group Inc., subject to the minimum purchase requirement set forth in the applicable portfolio's prospectus. Investors may contact the Advisor at the above-listed phone number for more information on such exchanges and to request copies of the prospectuses of portfolios of Dimensional Investment Group Inc.

The exchange privilege is not intended to afford shareholders a way to speculate on short-term movements in the markets. Accordingly, in order to prevent excessive use of the exchange privilege that may potentially disrupt the management of the Portfolio or otherwise adversely affect the Fund, any proposed exchange is subject to the approval of the Advisor. Such approval will depend on: (i) the size of the proposed exchange; (ii) the prior number of exchanges by that shareholder; (iii) the nature of the underlying securities and the cash position of the portfolios involved in the proposed exchange; (iv) the transaction costs involved in processing the exchange; and (v) the total number of redemptions by exchange already made out of the Portfolio. Excessive use of the exchange privilege is defined as any pattern of exchanges among portfolios by an investor that evidences market timing.

The redemption and purchase prices of shares redeemed and purchased by exchange, respectively, are the net asset values next determined after the Advisor has received a letter of instruction in good order. "Good order" means a completed letter of instruction specifying the dollar amount to be exchanged, signed by all registered owners of the shares; and if the Fund does not have on file the authorized signatures for the account, proof of authority and a guarantee of the signature of each registered owner by an "eligible guarantor institution." Such institutions generally include national or state banks, savings associations, savings and loan associations, trust companies, savings banks, credit unions, and members of a recognized stock exchange. Exchanges will be accepted only if stock certificates have not been issued and the shares of the Portfolio being acquired are registered in the investor's state of residence.

REDEMPTION OF SHARES

Redemption Procedure

Investors who desire to redeem shares of the Portfolio must first contact the Advisor at (310) 395-8005. Shareholders who invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding redemption procedures. The Portfolio will redeem shares at the net asset value of such shares next determined, after receipt of a written request for redemption in good order, by the transfer agent (or by an Intermediary or a Sub-designee, if applicable). "Good order" means that the request to redeem shares must include all necessary documentation, to be received in writing by the Advisor no later than the close of regular trading on the NYSE (normally 1:00 p.m. PT), including but not limited to: a letter of instruction or a stock assignment specifying the number of shares or dollar amount to be redeemed, signed by all registered owners (or authorized representatives thereof) of the shares; and if the Fund does not have on file the authorized signatures for the account, proof of authority and a guarantee of the signature of each registered owner by an eligible guarantor institution; and any other required supporting legal documents. A signature guarantee may be obtained from a domestic bank or trust company, broker, dealer, clearing agency, or savings association who are participants in a medallion program recognized by the Securities Transfer Association. The three recognized medallion programs are Securities Transfer Agents Medallion Program (STAMP), Stock Exchanges Medallion Program (SEMP), and New York Stock Exchange, Inc. Medallion Signature Program (MSP). Signature guarantees that are not a part of these programs will not be accepted.

Shareholders redeeming shares who have authorized redemption payment by wire in writing may request that redemption proceeds be paid in federal funds wired to the bank they have designated in writing. The Fund reserves the right to send redemption proceeds by check in its discretion; a shareholder may request overnight delivery of such check at the shareholder's own expense. If the proceeds are wired to the shareholder's account at a bank that is not a member of the Federal Reserve System, there could be a delay in crediting the funds to the shareholder's bank account. The Fund reserves the right at any time to suspend or terminate the redemption by wire procedure after prior notification to shareholders. No fee is charged for redemptions. The redemption of all shares in an account will result in the account being closed. A new Account Registration Form will be required for future investments. See "PURCHASE OF SHARES." In the interests of economy and convenience, certificates for shares are not issued.

Although the redemption payments will ordinarily be made within seven days after receipt, payment to investors redeeming shares that were purchased by check will not be made until the Fund can verify that the payments for the purchase have been, or will be, collected, which may take up to ten days. Investors may avoid this delay by submitting a certified check along with the purchase order.

Redemption of Small Accounts

With respect to the Portfolio, the Fund reserves the right to redeem an account if the value of the shares in the Portfolio is \$500 or less because of redemptions. Before the Fund involuntarily redeems shares from such an account and sends the proceeds to the shareholder, the Fund will give written notice of the redemption to the shareholder at least sixty days before the redemption date. The shareholder will then have sixty days from the date of the notice to make an additional investment in order to bring the value of the shares in the account for the Portfolio to more than \$500 and avoid such involuntary redemption. The redemption price to be paid to a shareholder for shares redeemed by the Fund under this right will be the aggregate net asset value of the shares in the account at the close of business on the redemption date. The right to redeem small accounts applies to accounts established with the Fund's transfer agent.

In-Kind Redemptions

When in the best interests of the Portfolio, it may make a redemption payment, in whole or in part, by a distribution of portfolio securities in lieu of cash. Such distributions will be made in accordance with the federal securities laws and regulations governing mutual funds in accordance with Rule 18f-1 under the 1940 Act. The Portfolio also reserves the right to redeem its shares in the currencies in which its investments are denominated. Investors may incur brokerage charges and other transaction costs in selling such securities and converting such currencies to dollars. Also, the value of foreign securities or currencies may be affected by currency exchange fluctuations.

DISCLOSURE OF PORTFOLIO HOLDINGS

The Portfolio generally will disclose up to its 25 largest portfolio holdings (other than cash and cash equivalents) and the percentages that each of these largest portfolio holdings represent of the total assets of the Portfolio, as of the most recent month-end, online at the Advisor's public website, www.dimensional.com, within 20 days after the end of each month. The Portfolio also generally will disclose its complete portfolio holdings (other than cash and cash equivalents), as of month-end, online at the Advisor's public website, three months following the month-end. Please consult the SAI for a description of the other policies and procedures that govern disclosure of the portfolio holdings by the Portfolio.

DELIVERY OF SHAREHOLDER DOCUMENTS

To eliminate duplicate mailings and reduce expenses, the Portfolio may deliver a single copy of certain shareholder documents, such as this Prospectus and annual and semi-annual reports, to related shareholders at the same address, even if accounts are registered in different names. This practice is known as "householding." The Portfolio will not household personal information documents, such as account statements. If you do not want the mailings of these documents to be combined with those of other members of your household, please call us collect at (310) 395-8005. We will begin sending individual copies of the shareholder documents to you within 30 days of receiving your request.
